MONtex Forge

Management Information System (MIS)

Data & Information Requirement Document

Prepared For	Top Management – Montex Forge
Purpose	MIS Dashboard Requirement & Data Collection
Preferred Data Period	12–36 Months, wherever available
Document Status	For Information & Data Collection
Date	01 October 2026

This document identifies the internal business information and sample data required to design an accurate, management-focused MIS Dashboard for Montex Forge.

1. Existing Software & Data Sources

Please provide details of the software and systems currently used for maintaining business data.

- ERP / Business Management Software name
- Accounting software / Tally details
- Production management software, if any
- Inventory / stock management system
- CRM / Sales management system, if any
- Existing databases, APIs or other digital systems
- Excel / CSV files currently used for daily or monthly reporting
- Existing MIS or management dashboard
- Reports currently generated for management

Required: Please share sample copies/screenshots of the major reports currently being used.

2. Customer Master Data

- Customer ID and Customer Name
- Contact Person, Contact Number and Email
- Location, Industry / Customer Type
- Payment Terms and Credit Limit
- Assigned Sales Person
- Active / Inactive Status
- Last Order Date, Average Order Value and Order Frequency, if available
- Previous Order History, if available

3. Product Master Data

- Product ID / Code
- Product Name and Product Category
- Size
- Material Grade
- Standard / Specification
- Unit of Measurement
- Standard Weight
- HSN Code
- Standard Selling Price, if maintained

Required: Please provide the latest Product Master file.

4. Sales & Quotation Data

Please provide historical sales and quotation data, preferably for the last 12–24 months.

Quotation Data

- Quotation Number and Date

- Customer and Product
- Quantity and Quoted Rate
- Discount and Quotation Value
- Sales Person
- Status
- Follow-up Date
- Final Result – Won / Lost / Pending
- Reason for Loss, if available

Sales Order Data

- Sales Order Number and Order Date
- Customer and Product
- Quantity and Rate
- Order Value
- Expected Delivery Date
- Actual Delivery Date
- Order Status
- Pending Quantity
- Completed Quantity

5. Production Data

Please provide production records, preferably for the last 12 months.

- Production Date and Shift
- Machine and Operator
- Product and Batch Number
- Input Quantity
- Forged Quantity
- OK Quantity
- Rejected Quantity
- Rework Quantity
- Production Hours
- Downtime
- Production Capacity

If production reports are already maintained in Excel or software, please share sample reports instead of creating a new format.

6. Quality & Rejection Data

- Inspection Date
- Order / Batch Number
- Product

- Quantity Inspected
- Quantity Passed
- Quantity Rejected
- Quantity Reworked
- Rejection Reason
- Inspection / Test Type
- Inspector / Department
- Remarks

Please also provide the standard rejection / quality limits currently followed by the company, if defined.

7. Machine & Maintenance Data

Machine Information

- Machine ID and Machine Name
- Machine Type
- Production Capacity
- Current Status
- Installation Date, if available

Maintenance Information

- Breakdown Date
- Machine
- Breakdown Reason
- Start Time
- Repair Completion Time
- Total Downtime
- Maintenance Type
- Maintenance Cost
- Parts Replaced, if available

If machine status or machine logs are available digitally through PLC / SCADA / IoT / software, please provide details of the system and available data format.

8. Furnace Data

- Furnace ID
- Date / Time
- Temperature
- Target Temperature
- Fuel Consumption
- Fuel Type
- Batch / Product
- Start Time

- End Time
- Operator
- Historical Furnace Logs

Important: Please provide the company-defined temperature limits / thresholds for normal, warning and critical conditions, if available.

9. Raw Material & Inventory Data

Raw Material

- Material ID
- Material Name
- Material Grade
- Supplier
- Unit
- Current Stock
- Minimum Stock Level
- Maximum Stock Level

Purchase Data

- Purchase Order
- Supplier
- Material
- Quantity
- Purchase Rate
- Purchase Value
- Purchase Date

Stock Movement

- Opening Stock
- Purchases
- Consumption
- Production Usage
- Scrap
- Closing Stock

10. Finance & Receivables Data

Invoice Data

- Invoice Number and Invoice Date
- Customer
- Order Number
- Product
- Quantity

- Invoice Value
- Tax / GST
- Total Invoice Value
- Due Date

Payment Data

- Customer
- Invoice Number
- Payment Date
- Payment Amount
- Payment Mode
- Reference Number, if applicable

Outstanding Data

- Customer
- Invoice Number
- Invoice Date
- Due Date
- Invoice Amount
- Amount Paid
- Outstanding Balance
- Days Outstanding

Please also provide the current ageing format used by the Finance department, such as 0–30, 31–60, 61–90 and 90+ days.

11. Product & Customer Costing / Profitability

For the profitability section of the MIS, please provide details of the current costing methodology followed by Montex Forge.

- Raw Material Cost
- Labour Cost
- Power Cost
- Fuel Cost
- Machining / Processing Cost
- Heat Treatment Cost
- Testing / Inspection Cost
- Packing Cost
- Transportation Cost
- Other Direct Costs
- Allocated Overheads

Key Question: How is the actual cost and profit / margin of a product or order currently calculated? If an existing costing report is available, please share a sample.

12. Dispatch Data

- Dispatch Number
- Order Number
- Customer
- Product
- Quantity
- Dispatch Date
- Invoice Number
- Dispatch Value
- Transporter
- Destination
- Vehicle / LR details, if maintained
- TC Status
- MTC Status
- Inspection Status
- Pending / Delayed Dispatch Status

13. Order & Delivery Tracking

- Order Number
- Customer
- Product
- Ordered Quantity
- Completed Quantity
- Pending Quantity
- Due Date
- Expected Completion Date
- Actual Completion Date
- Current Status
- Delay Reason

If standard delay categories are already used, please provide them.

14. Tender Data

- Tender ID
- Tender / Portal Name
- Customer / Department
- Tender Date
- Closing Date
- Product

- Quantity
- Estimated Value
- Quoted Value
- Bid Status
- Result
- Follow-up Date
- Assigned Person
- Reason for Loss, if available

Please also confirm whether tender data is maintained manually, through a portal, Excel, ERP or another system.

15. Sales Follow-up & Repeat Orders

- Quotation Number
- Customer
- Quotation Date
- Quotation Value
- Sales Person
- Last Follow-up Date
- Next Follow-up Date
- Status
- Expected Order Date
- Expected Order Value

For repeat-order analysis, please provide historical customer order data wherever available.

16. Employee / Operator Information

- Employee ID
- Employee Name
- Department
- Role
- Shift
- Assigned Machine / Section
- Operator / Staff Category

If operator-wise productivity is currently measured, please provide the existing productivity report or calculation method.

17. Electricity & Power Consumption

- Date
- Machine / Section
- Units Consumed
- Production Quantity

- Power Consumption per 1,000 pcs
- Monthly Consumption
- Historical Power Data

Please confirm whether this information is available from meters, machines, ERP, Excel or manually.

18. Management Targets & KPIs

- Monthly Sales Target
- Monthly Production Target
- Monthly Dispatch Target
- Collection Target
- Gross Margin Target
- Rejection Target
- Machine Utilisation Target
- On-Time Delivery Target
- Inventory Target
- Outstanding Target
- Other KPIs currently reviewed by Top Management

19. Management Reports Currently Used

Please share sample copies of the reports currently presented to the owner / management.

- Daily Production Report
- Daily Dispatch Report
- Daily Sales Report
- Outstanding Report
- Collection Report
- Stock Report
- Purchase Report
- Rejection Report
- Machine Report
- Furnace Report
- Quotation Report
- Order Pending Report
- Tender Report
- Monthly MIS
- Any other management report

These reports will help ensure that the new MIS Dashboard follows the actual management requirements.

20. Alert & Notification Requirements

Please provide the company's preferred thresholds for important alerts.

Area	Alert Required	Company Threshold
Rejection	High rejection	_____ %
Furnace	High temperature	_____ °C
Machine	Excess downtime	_____ minutes
Outstanding	Critical ageing	_____ days
Order	Delivery delay	_____ days
Inventory	Low stock	_____ quantity / days
Sales	Below target	_____ %
Payment	Collection shortfall	_____ %

21. Historical Data Requirement

Preferred: 12–36 months of historical data wherever available.
Minimum useful period: 6–12 months.

- Sales
- Orders
- Production
- Rejection / Quality
- Customers
- Products
- Raw Material
- Invoices
- Payments
- Dispatch
- Machine / Maintenance
- Other relevant business records

22. Data Privacy & Sensitive Information

The information provided will be used only for the development and configuration of the Montex Forge MIS Dashboard.

- Sensitive customer names may be masked where required.
- Contact numbers, bank details and personal information may be masked.
- Sample / anonymized records may be provided where appropriate.
- The structure, fields and calculation methodology should preferably remain visible so that the dashboard can be designed correctly.

23. Preferred Submission Format

Please provide the available information in the format in which it is currently maintained. There is no need to manually convert existing records into a new format at this stage.

- Excel / CSV
- Database Export
- ERP Export
- PDF Reports
- Screenshots
- Existing MIS Reports
- Other available formats

For each data source, it would be helpful to mention the Department, Report/System Name, person responsible for maintaining it, frequency of update, historical period available and file/system format.

24. Priority Information

Priority	Information Required
1 – Essential	ERP/software details; Customer Master; Product Master; Sales/Order data; Production; Dispatch; Invoice; Paym
2 – Important	Machine; Furnace; Maintenance; Costing; Quotation & Follow-up; Tender; Power Consumption
3 – Enhancement	Operator Productivity; Repeat-order analysis; Historical management KPIs; Additional management reports

25. Final Confirmation Required from Management

1. Which data sources can be accessed for MIS development?
2. Which reports should be considered the official source of truth?
3. Which KPIs are most important for Top Management?
4. Which KPIs require real-time / near-real-time updates?
5. Which information should generate immediate alerts?
6. Who will be the final approver of the dashboard?
7. Which departments will provide / verify the data?
8. Whether historical data can be provided for analysis.
9. Whether the dashboard will be accessed only within the office network or remotely as well.
10. Whether WhatsApp-based daily / critical alerts are required.

Management / Department Confirmation

Name _____

Department / Designation _____

Signature _____

Date _____

Final. Expected Outcome

The collected information will be used to design a centralized MIS Dashboard providing Top Management with a consolidated view of Sales, Orders, Production, Quality, Inventory, Dispatch, Finance, Outstanding, Profitability, Tenders and Alerts. The objective is to provide accurate, timely and actionable business information from a single dashboard while reducing dependency on manually prepared reports.
